

ABSTRACT

10031267-101901

A battery pack comprises: a battery unit (12) including a plurality of batteries (1) arranged flatly and electrically
5 connected with one another by either series or parallel connection, or a combination thereof; a pair of heat transfer plates (8a, 8b) made of a material exhibiting excellent thermal conductivity and arranged in parallel to a surface where the battery unit (12) is arranged, of which one makes surface
10 contact with a top-surface side of each of the batteries (1) of the battery unit (12), and the other makes surface contact with a back-surface side of each of the batteries (1) of the battery unit (12); and a housing (2) made of a material exhibiting excellent thermal conductivity, the housing
15 accommodating the battery unit (12) and the pair of heat transfer plates (8a, 8b) and making surface contact with the pair of heat transfer plates (8a, 8b).
